

CURATING CONTENT - QUICK GUIDE

FIT WITH LEARNING OBJECTIVES

Is this going to help with the learning? Or is it just really, really cool? Be ruthless with your curation!

QUALITY OF MATERIALS

Are the materials accurate? Engaging? Reputable? Is this the best that is out there?

FEASIBILITY OF USING MATERIALS

Are the materials accessible? Is it the appropriate level of effort? You may find a great online module but if it has 10 hours of video, your participants might not actually be able to benefit from it.

ADAPTABILITY OF MATERIALS

You might discover that there isn't one specific thing out there that will work. In this case, you might need to think about how you can re-package some content.
